**5/ Fast forward and fast rewind: (requires restart the machine )**

Plug earphone , push the switch to "ON" position , then press "+" key , release your hand until the pla starts; and press "+" key to fast forward, Long press the "-" key to rewind. You need to set it every time if you want to use it. There is no volume adjustment in this state.

## Q&A

### 1/Suddenly unable to record:

Please back up important files first and format them on the computer. If they can be used normally after formatting, please clean up the computer in time. This is a computer virus infection of the recorder, causing the recorder to be unusable. It may take a long time. It will cause damage to the machine beyond repair.

### 2/The indicator light has no response or is always on in an abnormal state:

Please back up important files first, and then restore the factory settings. After connecting to the computer, click My Computer, find the mobile drive letter and right-click the mouse, select Format, and then select Quick Format. In this way, the factory settings can be restored and most of the faults can be eliminated.

### 3/No response after connecting to the computer via the data cable:

Reconnect the computer (check whether the plug is inserted in place) and see if the removable disk can be found. If the computer still does not respond, try to connect to a different computer. Some computers cannot be recognized because of lack of drivers. If you still can't recognize it after trying (the recorder is always red or blue), you can contact the after-sales firmware upgrade.

#### 4/Turn on the earphones but not enter the play state

Insert the earphones, turn the switch to the ON position, after the light goes out, turn the switch back to the OFF position, when you see the red light, turn the switch to the ON position again, and it will enter the playback state.

**★★★This machine comes with an intelligent reset system, please save the recording file before connecting to the computer. Because the recording effect and sound quality of this product are relatively clear and the parameters are relatively high, the recording file is relatively large, please extract it in time. The company is not responsible for the loss of data.**

## Function parameter

Product type	Voice recorder	4GB	Can save 48 hours
Record method	Power on recording, power off saving	8GB	Can save 96 hours
Battery	Environmentally friendly polymer lithium battery	16GB	Can save 192 hours
Recording bit rate	192KBPS	32GB	Can save 384 hours
Recorder format	WAV	Sampling Rate	48KHz
Play format	MP3/WMA/WAV		

## Precautions

- 1/ When charging or connecting to a computer, turn on the switch to the "OFF" position. When unplugging, wait until the light is off before using it.
- 2/ After recording, regardless of whether the recorder is powered or not, you must turn the switch to the "OFF" position to save the recording file, otherwise the recording file will be lost.
- 3/ Please use a power adapter with a **charging current of 1A or less** for charging, otherwise it may damage the unit or cause danger (this product does not have a standard power adapter).
- 4/ It is recommended to **use the original USB data cable** to connect the unit to the computer for charging.
- 5/ In charging state, the recorder flashes red light; once finish charging, the recorder will be blue light on.
